WHEN: October 2, 2008
8am – 2pm

WHERE: NYU Kimmel Center
60 Washington
Square South
New York, NY 10012

COST: \$100 general admission
\$60 students
\$800 table of 10

Includes breakfast,
lunch and
refreshments

PDH: 2.5 *subject to approval*

NYC is in the middle of designing and building several major transit projects. The Institution of Civil Engineers is dedicated to spreading best practice in engineering and promoting a successful partnership between British and American engineers. This event will present lessons learned on a similar urban project, the Channel Tunnel Rail Link, a new rail line beneath the City of London.

Speakers from the project and the ICE's President will introduce the project, describe how the environmental and physical challenges were resolved, and review the new contractual approach that kept the \$10 billion project on time and on budget. A panel discussion with local industry leaders will tie in this experience to the New York market.

For more information please visit: www.iceusa.org
Ticket Information please see attached form.

Channel Tunnel Rail Link:

An urban construction success story

8.00am	Registration & Breakfast
